Diamond Undercut Protection

The *Alpha Core Drill Bit* is designed for drilling the faucet-mounting holes in counter tops and vanities. It can also be used to make clean rounded corners for square or rectangular sinkholes. The *Alpha Core Drill Bit* is very versatile and can be adapted for use in construction trades wherever holes are needed for water, gas and electrical piping, especially when natural stone or ceramic tile is already installed. The *Alpha Core Drill Bit* is designed to work on a drill press with a water swivel attachment or free hand using a wet polishing tool such as the AEP-458 or AIR-658. Since it must be used wet, a tool with a central water feed or a water swivel is necessary. The convenience of a portable hand polishing tool makes the *Alpha Core Drill Bit* very adaptable for a variety of applications. Available in 3/8", 1/2", 3/4", 1", 1-1/4" and 1-3/8" sizes, these core drill bits are ideal for common faucet hole applications.

PART NO.	DIAMETER	THREAD	LIST PRICE
DCB00380	3/8"	5/8"-11	\$92.00
DCB00500	1/2"	5/8"-11	\$95.20
