

The Heart of the SL3® Quick Change Family

High tech design & manufacturing yield a supremely balanced, rock solid Snail Lock attachment. All of our SL3 products can utilize the quick change feature. Available in 5/8-11 or M14 thread.

Rigid Turbos

Our original Turbo abrasives are still the best for Seam Phantom use. 60, 150, and 300 grit turbos are supplied with every Seam Phantom kit. They provide a superior cutting and polishing action and can be used for any job that requires ultimate control. Available in 7 grits, from 60 to 3000.

Cup Wheels

Available in two sizes, the 2 inch cup wheel is used with the Seam Phantom to back bevel or undercut seams. Aggressive grit only.

3" cup wheels are used for heavy stock removal with the Seam Phantom or freehand. They are well balanced and available in fine, medium and aggressive grits.

Floating Turbos

Utilizing the same proven abrasive formula as our original Rigid Turbos, these are laminated to color coded plastic and utilize a hook & loop attachment. The plastic laminate keeps the abrasive rigid, while the hook & loop attachment provides "float" to make them extremely forgiving in use. We use these for flat edge polishing and Top Polishing. They attach to the 3" Center Hub Hook & Loop Backer which in turn locks onto our standard SL3 adapter. Available in 7 grits from 60 to 3000.

Hook & Loop Backers

Our Hook & Loop Backers are designed to lock into our SL3® adapter. They're constructed with high quality materials for long lasting durability. All machining is accomplished in house, and they are hand assembled, flattened, and trimmed to our high standards.

FOAM Hook & Loop Backers

SL3-FOAM3 (3" actual diameter) A semi-soft foam rubber pad allows this backer to conform to contours and inside corners. This will become your best ogee polisher.

SL3-FOAM4 (4.0" actual diameter) These utilize semi-soft foam rubber pad and were developed in conjunction with James Lang of Surface Savers. Used for quartz restoration.

SL3-FOAM7 (6.8" actual diameter) Utilizing a semi-soft foam rubber pad, this is one of the primary backers for quartz restoration.

Flexible Hook & Loop Backers

SL3-FLEX4 (3.6" actual diameter) Used with a well worn resin pad, this is the perfect backer to polish inside radius corners and inside curved sink cutouts.

RIGID Hook & Loop Backers

SL3-R3 (3" actual diameter) Use this to drive small fiber pads or cut down resin pads in restricted areas.

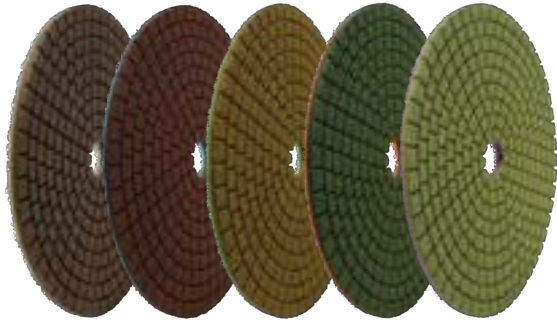

SL3-R4 (3.8" actual diameter) The basic backer for edge polishing. A 4" resin pad hangs slightly over the edge for a "soft" transition into corners.

SL3-R4TP (4" actual diameter) A TRUE 4" Backer. This is the best size for top polishing. It holds the resin pad flat against the stone, eliminating any haze around the polished area.

SL3-R5 (4.8" actual diameter) The basic size for 5" resin pads when refurbishing floors.

SL3-R7 (6.8" actual diameter) Used to drive our 7" Natural Blend Tan Fiber Pads and other hogs hair pads.

Redeemer Resins

These are the resin pads we supply in our Top Polish Kit. They produce a superior quality polish with excellent clarity on most true granite and quartzite. They polish at low speed (in a home) or high speed (in a shop) with very minimal down pressure but must be kept wet at all times. These pads eliminate the old wet-to-dry top polishing method and simplify the top polishing process, yielding amazing results. Available in 5 grits - 200, 500, 1000, 2000, & 3000.

Natural Blend Tan Fiber Pads

This Fiber Pad works well for applying MB-20 as the last step in top polishing granite and quartzite. This is what we supply in our top polish kit. 7 3/4" outside diameter with a removable 3 1/4" center disc. We use the larger portion (attached to a 7" Rigid Hook & Loop Backer) to polish the main counter area and the small center disc (attached to a 3" Rigid Hook & Loop Backer) for restricted areas.

Top Polish Kit **GRANITE & QUARTZITE**

This kit is the result of several years of collaboration and testing by the NSI Team. It contains the exact products we currently use to achieve superior top polish results on true granite & natural quartzite.

Kit Includes:

- SL3 Snail Lock Adapter (5/8-11 or M14 thread)
- (4) SL3 3" Center Hub Hook & Loop Backers
- 150 Grit SL3 Floating Turbo (Red)
- 300 Grit SL3 Floating Turbo (Yellow)
- 500 Grit SL3 Floating Turbo (Blue)
- 1000 Grit SL3 Floating Turbo (Dark Green)
- (3) SL3 True 4" Rigid Hook & Loop Backers
- 1000 Grit 4" Redeemer Resin (Dark Green)
- 2000 Grit 4" Redeemer Resin (Orange)
- 3000 Grit 4" Redeemer Resin (Purple)
- SL3 7" Rigid Hook & Loop Backer
- SL3 3" Rigid Hook & Loop Backer
- (3) 7 3/4" Natural Blend Tan Pad (includes 3 1/4" center cut)
- 8.5 oz. MB020 Granite Polish
- Presto white out pen
- China Markers (red & white)
