

Miter-It™ v2

New & Improved!

 **MADE IN THE USA**—FROM
US AND IMPORTED PARTS

MITERS MADE EASY

Wherever you would need a hand to hold the material, put a Miter-It™ there instead! The Miter-It™ is an easy-to-use jig that allows finished-side-up miter laminations. The jig's weight and non-marking, non-skid contact surface hold the product and miter piece in place—no suction cups needed.

The upgraded Miter-It™ v2 boasts a sturdier base and enhanced grip, resulting in stronger clamping force and ultimately delivering greater precision for achieving perfect 90 degree angles.

APPLICABLE PATENTS: [OMNICUBED.COM/PATENTS](https://www.omnicubed.com/patents)

FEATURES

- No flipping for gluing; protect your back and the material
- Squares the miter with fast, easy adjustments, eliminating the need for a helper
- Coarse and fine adjustments for exact seams
- More efficient than taping methods alone
- Accommodates mitered edges from 1"–5" tall, depending on material thickness

Sold in pairs with a free 25-yard sample roll of Kung Fu Tape™
