# NO LIFT INSTALL SYSTEM

## Edge Slider

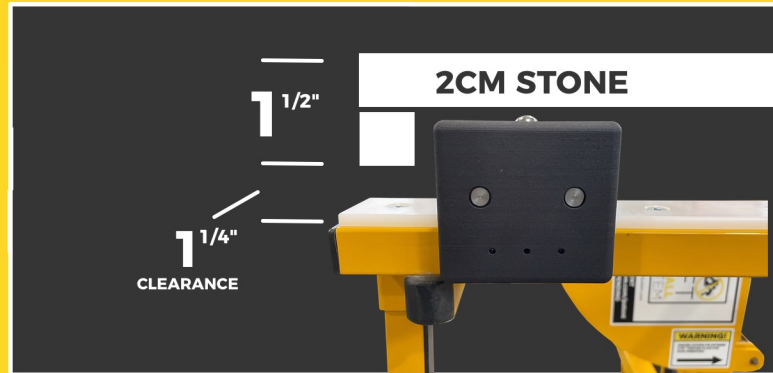

No Lift Install System has officially solved the laminated and mitered install problem with the Edge Slider! The Edge Slider is designed to work with ANY No Lift cart. The double axle provides stability while the roller bearing on top allows the counter to roll smoothly in any direction onto the cabinet. Each set comes with 8 Edge Sliders that can be placed anywhere on the No Lift deck. No matter what shape your laminated countertop is, the Edge Slider will allow full use and benefit of the No Lift Install System! Contact us today and let's reduce install related injuries together.

### MAXIMUM EDGE LIMITS CHART

#### 3CM STANDARD LAMINTED EDGE

#### 2CM STANDARD LAMINTED EDGE

#### 3CM MITERED EDGE

#### 2CM MITERED EDGE

\*Stone thickness can be inconsistent. You must calculate the total edge thickness to make sure you clear the deck of the NO Lift cart. 1 <sup>7</sup>/<sub>8</sub>" + stone thickness = total edge thickness.

No Installer Retires Before Their Time.
