- 1: Handlebars
- 2: Handle base
- 3: Non-slip foot rests
- 4: Vacuum surface
- 5: Angled vacuum port
- 6: Spring button
- 7: Cam lock lever
- 8: Cam lock clamp

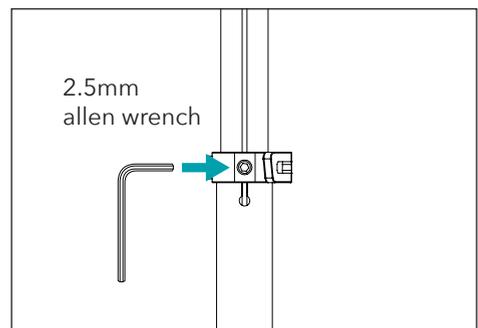

Assembling the SOS PRO

1. Press in the spring button and slide the handle into the handle base. Make sure the spring button lines up with the hole. It will snap into place.

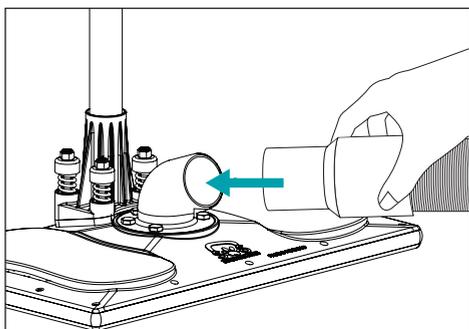

2. With the handle in place, pull the cam lock lever outward to loosen the clamp. Slide the handle up to desired height and press the lever back inward to tighten.

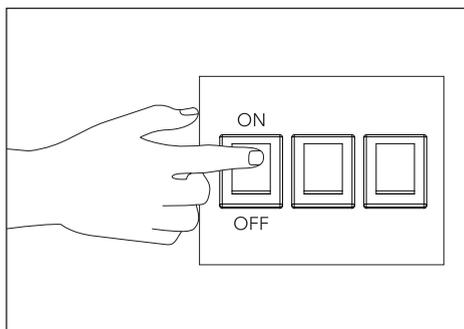

OPTIONAL: To ensure the handle will not move, tighten the set screw into the handle.

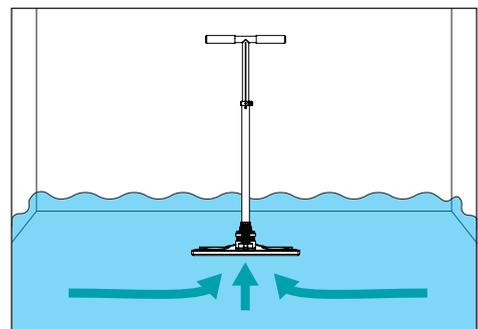

Using the SOS PRO

1. Connect vacuum hose from a portable or truck-mounted extractor. 2" cuffs will slide over the vacuum port and 1.5" cuffs will slide inside.

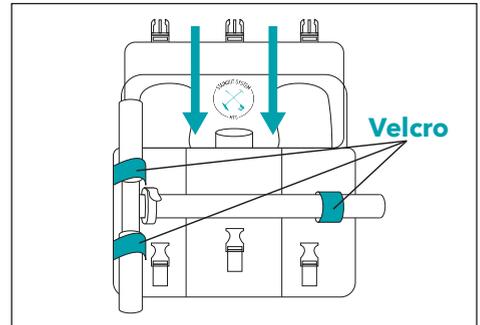

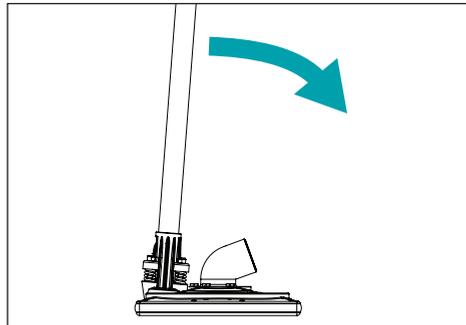

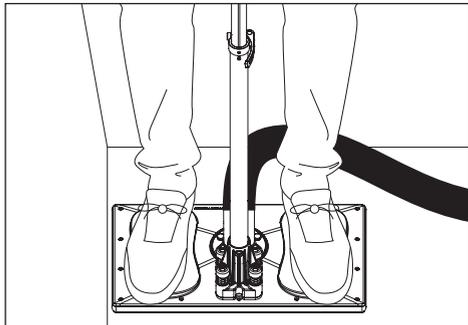

2. Turn the extractor ON.

3. If there is standing water, place the SOS PRO in the center of the room to remove the standing water down to the carpet level.

Using the SOS PRO (cont.)

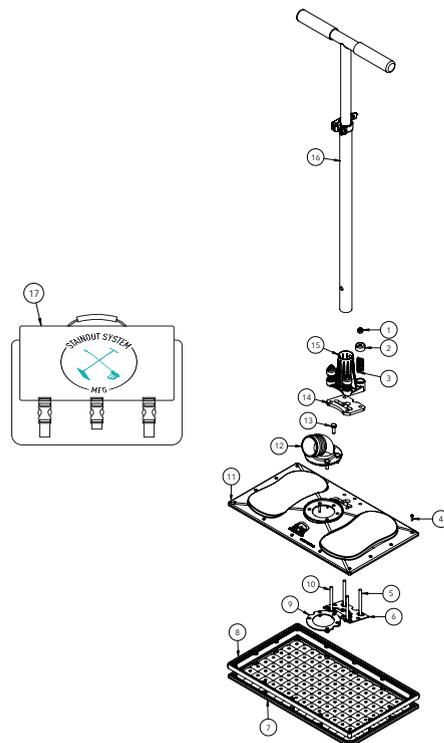

4. Place the SOS PRO in a starting point, usually a corner in the room and stand on it for about 5-30 seconds to extract water from the carpet and pad.

5. When you're ready to move to a new position, pull the handle back to release suction. Move the SOS PRO to a position that is directly adjacent to, but not overlapping, the previous extraction position.

6. After you have covered the entire extraction area, test the carpet to see if further extraction is required. When you are finished using the SOS PRO, store it in the included travel bag as shown above.
