

Seal, Enhance, Protect

-  Covalent Bonding
-  1K Single Component
-  Anti Graffiti
-  Extreme Hardness
-  UV Stable
-  Spray Applied

Coval Concrete is a thin-film, single component coating designed to install over **Coval Concrete Primer** or well-densified concrete to seal, enhance, and protect porous concrete surfaces. It creates a covalent bond with the coating substrate and is easily and quickly applied with an acetone pump sprayer. Coval Concrete is used on flooring, retaining walls, infrastructure, and all forms of precast concrete.

Coval Concrete forms a chemically resistant barrier to protect against staining, etching, and graffiti. It provides a sustainable solution - easy cleaning, reduced maintenance costs, and less dependence on harsh chemicals.

Coval coatings contain less than 100 g/L VOCs and exceed SCAQMD Rule 1113 requirements for air quality; as well as contain no known carcinogens under Proposition 65, California's Drinking Water and Toxic Enforcement Act of 1986.

Coval Concrete helps protect and maintain buildings, bridges, overpasses, walls, and more.

Infrastructure: Prevent weathering, staining, corrosion, and chloride ion penetration to extend the serviceable life and appearance of any sized project. Protect beyond the capabilities of a penetrating sealer with a coating that enhances the natural beauty of concrete, brick, stone, or paver substrates.

Precast: Ensure that public spaces, facilities, and furniture stand up to the constant abuse from both Mother Nature and the general population. Increased resistance to abrasion and graffiti help reduce maintenance and replacement costs for years, even in high traffic areas.

Concrete Flooring: Perfect coating for Grind & Seal application. For Stain & Seal, combine acetone dyes and Coval Primer with the coating for a fast, versatile, 1-day decorative system that produces stunning results.

Achieve ultimate protection on nearly any substrate with these related products. Contact an authorized Coval product representative or visit the website for details.
