

HEPA PRO PACK 10

The HEPAProPack 10 offers large 10-quart recovery capacity and the ultimate in HEPA filtration and clean-air technology. It is the only backpack equipped with three HEPA filters. The main HEPA filter is a large, drop-in, fail-safe HEPA filter mounted at the sealed side of the vacuum motor. It is individually tested and certified to a minimum efficiency of 99.97% at .3 microns based on IEST-RP-CC007 particle count method. Two smaller HEPA filters are mounted at the motor's output to ensure total clean-air exhaust. This genuine HEPA vacuum is lightweight and worn comfortably on the back for extended working periods. Perfect for professional abatement and restoration, and for advanced cleaning in schools, healthcare and other sensitive public areas. Equipped with an 18-inch drop cord. Add up to 75-feet of extension cord for extra wide area cleaning.

FEATURES:

- Two-stage, 1.7HP, Ametek motor with thermal protection provides powerful suction and guards against overheating.
- Four-stage filtration including individually tested and certified HEPA filter prevents premature clogging and ensures clean air exhaust.
- Padded harness with handle allows for free arm movement, enhancing cleaning performance while minimizing stress to the operator's body.
- Lightweight, polyethylene body resists impacts and withstands years of professional use.

TECHNICAL SPECIFICATIONS:

Item Number	125-1254-20
Vacuum Motor	1200W/10Amp
CFM	104
Waterlift	100"
Machine Weight	15 lb.
Shipping Weight	23 lb.
Warranty	1-year
Disposable filter bag	122-3228-14

TOOL KIT:

122-3025-14-1	2-piece Aluminum Wand (5 foot)
122-3030-14	Round dusting brush
122-3060-14	Crevice Tool 17"
122-3070-14	Upholstery Tool
122-3044-14	Multi-Surface Floor Tool
122-3012-14	Hose 1.5" x 6 ft.

HEPA PRO PACK 10

On-Off Switch: Hip mounted for easy access.

TESTED & CERTIFIED HEPA FILTER:

The HEPAProPack is equipped with a "Fail-Safe" HEPA filter system that protects against discharge or bypass of dangerous dust particles from the vacuum cleaner. This modular, drop-in and removable HEPA filter, cloth pre-filter and disposable paper bag, all seal together tightly under suction. There is zero risk of the operator incorrectly installing the HEPA filter and accidentally causing bypass, thus contaminating the air with dangerous particles. Also, in the event of a failure, by rupture or the like, of the cloth filter bag or disposable paper bag, the HEPA filter is the final filter and certified to trap any particles before they can be released into the air.

The HEPA filter is individually tested and certified to be 99.97% efficient at .3 microns according to IEST-RP-CC001 test requirement.

Disposable Paper Bag:
Part # 122-3228-14

Cloth Bag:
Part # 122-3230-14

HEPA Filter:
Part # 127-3321-14
