

# Tenax

## Vertigo S

OUR LATEST GENERATION OF VINYL ESTER GLUE FORMULAS.

You can now order them in these sizes:

1 quart

1 gallon

5 gallon

Big Box: Comes with four 1.25 gallon cans

Tenax Vertigo S is made to work with:

- Marble - especially white colored materials.
- Granite - all granites.
- Quartzite
- Quartz - all quartz materials, especially the white.
- Ceramic and Porcelain - from the thinnest to the thickest materials, the bond is extremely strong.

Vertigo S cures shiny and is very easily polished. It takes color very well. Vertigo S is extremely strong with excellent adhesion with a fast cure time of about 20 minutes.

Vertigo S in the can looks very very light in color and when spreading it becomes almost invisible. This characteristic makes working with light and white colored materials much easier.

**Smooth**

**Near Colorless**

**UV Stable**

**Non-Drip Formula**
