

TOP LINE**Description**

The best solution to profile and polish the edge. Long lasting and best finishing. The set is composed of 4 **UHS** (Ultra High Speed) metal bond wheels and 2 express polishers. Slots created by **EDM** (Electro Discharge Machine) technology for the water cooling system and the refrigeration of the diamond surface

**Available sizes**

Diam. Ø120 mm
Bore 35 mm

**FAST LINE****Description**

It allows to profile and polish either internal cutout or on the outer edge of the countertop, long lasting and high speed, best finishing. The set is composed of 4 **UHS** (Ultra High Speed) metal bond wheels and 2 express polishers. Slots created by **EDM** (Electro Discharge Machine) technology for the water cooling system and the refrigeration of the diamond surface

Available sizes

Diam. Ø 80 mm
Bore 35 mm

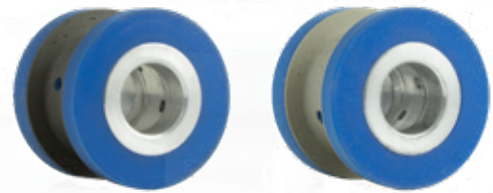

TWIST LINE

Description

It allows to profile and polish the edge with high performance of durability and finishing, also in case of medium radius. The set is composed of 4 **UHS** (Ultra High Speed) metal and 2 express polishers. Slots created by **EDM** (Electro Discharge Machine) technology for the water cooling system and the refrigeration of the diamond surface

Available sizes

Internal diam. Ø40 mm
Bore 22 mm

position 5 is also available in express polishers

MFP5

MFP5 Metal Polishing Wheel Description

The MFP5 is suggested in pos. 5 to avoid lines left during profiling of the metal. Longer life of the complete set - can be redressed - long term economic solution. Available in different shapes

Available sizes

Diam. Ø80 mm
Bore 35 mm
Internal diam. Ø40 mm
Bore 22 mm

Micronline I Description

Available in MicronLine limited shapes

Available sizes

Internal diam. Ø20 mm
1/2" gas fitting

ERASER RESIN TOOLS

Resin bond diamond tool for flat edge

Description

Pos. 5 Resin bond wheel on straight profiles only - To erase lines left on the material

Available sizes

Diam. Ø80X25 mm - bore 35 mm
 Diam. Ø80X35 mm - bore 35 mm
 Diam. Ø20X35 mm - 1/2" gas fitting
 Diam. Ø20X45 mm - 1/2" gas fitting

MICRON LINE

Description

Maximum precision to profile and polish the little radius, such as the internal sink cutout. The particular design of the 2 segments UHS (Ultra High Speed), allows high performance. The set is composed of 4 **UHS** metal and 2 express polishers. Slots created with **EDM** (Electro Discharge Machine) technology for the water cooling system and diamond surface refrigeration.

Available sizes

Diameter Ø 20 mm
 1/2" gas fitting

position 5 is also available in express polishers

MicronLine
 STONE DIVISION

NANO LINE

Description

It is suitable for little job, it allows to polish very small radius (internal radius 5mm). The set is composed of 3 metal vacuum brased router bit + 2 Express polishers

Available sizes

Internal diam. Ø10 mm
 1/2" gas fitting

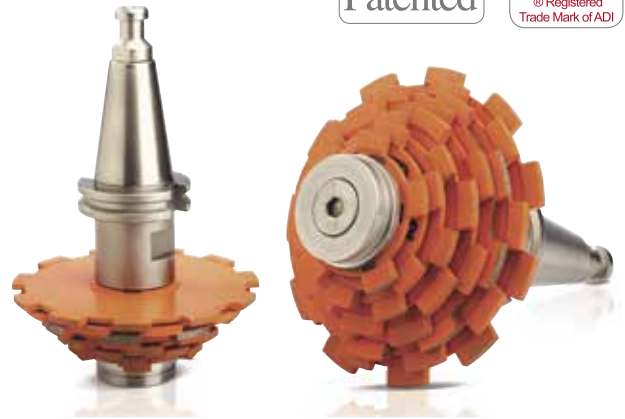

NanoLine
 STONE DIVISION

NINJA BLADES**Description**

Segmented blades for the pre-cut, assembled to obtain the profile needed. They preserve the set of profiling wheels, you can buy them individually.

Available sizes

min Ø 70 mm
 max Ø160 mm
 Bore 35 mm

**SOLUTION FOR 90° COUPLING****Description**

Wheels for 90° coupling of two workpieces cut at 45° thickness 2-3-4 cm, pos. 1 segmented and pos. 2 vacuum brased.

Available sizes

Ø146 mm
 Bore 35 mm

**ZEROCHIPPING SEAM SOLUTION****Description**

Segmented wheel straight profile (Z) to profile without chipping, available in Ø50 mm and Ø60mm, pos. 1 segmented, pos. 2 and 3 in continuous rim with slots

Available sizes

Ø 50 mm | Ø 60 mm
 Bore 35 mm

Stone Division

PROFILING ON CNC

PROFILE WHEEL FOR MARBLE

Description

2 electroplated wheels with milled body, bore 35mm, 1 electroplated wheel with continuous rim, 2 positions abrasive polishers. Available in different shapes also on customer's drawing.

Available sizes

thickness

20 mm

30 mm

40 mm

Bore 35 mm

UHS® delivers the fastest feed rates, longest tool life

EDM technology that gives high precision in the profile and in the slots of metal tools
