

# TravFill™

## Mortar For Filling Holes & Pockets In Travertine

TravFill™ is a two-component, lime-based, latex modified filler material for travertine floors, fabrication of stone slabs and other porous stones.

### Product Information

- Mix Ratio = add latex to form slurry to mortar consistency
- Set Time = 1-3 hrs @ 75°F
- Easy to use
- Fast curing
- Low cost
- Breathable-moisture vapor permeability
- UV-stable
- Zero VOC
- Colors Available: Neutral and Travertine

### Applications

- Filling voids and pits in travertine floors
- Skim coating vertical stone
- Designed for durable aesthetic repairs
- Create a honed travertine like finish
- Easy to mix and apply to your surface
- Designed as a slurry or knife grade application
- Slight over fill technique for floor machining

### Colors

- Neutral
- Travertine

### Available In

- 7lb Kit
- 63lb Kit
