

SERUM APC

WITH 5% FORMULATED HYDROGEN PEROXIDE

ALL PURPOSE CLEANER

CLEANS UP

- MOLD AND MILDEW
- CLOSED PROPERTIES
- MUSTY ODORS
- CABINETS
- POROUS STONE
- CONTENTS
- GLASS & MIRRORS
- STAINLESS STEEL
- SINKS
- SHOWER STALLS

DESCRIPTION

Serum APC is intended to be use as a general purpose cleaner for all surfaces not harmed by water. **Serum APC** is designed to wet out the surface, break surface tension and lift the soil out of the substrate and off the surface, emulsify and suspend the soil in the **Serum APC** liquid to allow it to be easily wiped away off the surface.

Serum APC will remove all the dust, dirt, organic and inorganic soils as well as kill the odors. **Serum APC** will enhance surface colors and brighten dull surfaces. After using **Serum APC**, the space will have none of the original odor. It will smell fresh and clean.

INSTRUCTIONS

Using a trigger sprayer turn the nozzle to yield a very fine spray. Apply the solution of **Serum APC** to vertical surfaces from the bottom up. This will prevent clean streaking. This will allow enough liquid on the surface without a lot of waste. Getting the surface damp is the object. Allow a few seconds dwell time for the product to work. Using a soft cloth or micro fiber cloth, begin to wipe vertical surfaces from the top down. Return to the top starting point and dry the surface with a new dry white cloth or micro fiber cloth. Repeat this process on all surfaces until job is completed. A simple light spray on ceilings would be indicated to treat the ceiling. If the ceiling is blown popcorn, **DO NOT SCRUB OR WIPE THE CEILING AFTER APPLYING THE Serum APC** If the ceiling is painted and/or stippled, you may wipe this with soft cloth, micro fiber cloth or soft pads on long handles.
