

SHINE PRO

KEEP FLOORS CLEAN, BRIGHT AND SAFE

EXTEND THE LIFE OF YOUR FLOORS AND PRESERVE YOUR INVESTMENT

REPAIR SMALL PROBLEMS BEFORE THEY BECOME BIG PROBLEMS
traffic patterns, low gloss, stains

ONE SIZE DOES NOT FIT ALL
maintenance be tailored to fit your floor needs

Polished concrete floors are low-maintenance, but they aren't no-maintenance. Once you have installed polished concrete floors in your building, a maintenance program needs to be implemented to help preserve your investment. Many things can deteriorate the cleanliness, shine and safety of your floor - foot and equipment traffic, spills, improper use of chemicals and equipment, etc. This is where ShinePro comes in. It equips you with all the necessary tools to keep your polished concrete floors cleaner, brighter and safer.

THE RIGHT TOOLS

FOR THE RIGHT JOB

EQUIPMENT AND DIAMOND PADS FOR FLOOR RESTORATION AND MAINTENANCE

manufactured by

SHINEPRO SCREENS

LAVINA® B36G-S
PLANETARY POLISHER

PROPANE

Reduce your time on the job site with this super efficient and versatile floor machine. You can do it all - hone, polish, maintain and burnish.

- 915-mm work path with 3x356-mm heads
- Forced planetary drive
- Tool holder rpms: 1666-3000
- Propane Kawasaki engine 603cc, 36.8cu.in.
- Can be used wet or dry

LAVINA® B21
BURNISHER

ELECTRIC

Ideal for job sites where propane equipment is not allowed!

- 533-mm work path
- 3 phase, 380-400V, 50-60Hz, 15 Amps
- Tool holder rpms: 1500-2000
- 4.5kW motor
- Can be used wet or dry

SHINE PRO

DIAMOND SYSTEM FOR FLOOR RESTORATION AND MAINTENANCE

SHINEPRO® DIAMOND PADS

AN EFFICIENT AND VERSATILE SOLUTION FOR FLOOR RESTORATION AND MAINTENANCE.
OUTSTANDING RESULTS ON POLISHED CONCRETE, NATURAL STONE, TERRAZZO, AND VCT.

ShinePro diamond pads can be used Dry on high speed burnishers, and Wet on auto scrubbers, buffers and other floor machines. For wet applications, use them with water, or any approved cleaning solution. It is very important that operators not over apply cleaners to the floor, as this can leave behind residue and interfere with the floor shine. Offered in 7, 8, 9, 12, 13, 14, 15, 16, 17, 18, 20, 21, 24 and 27 inch sizes.

Item Number	Description	Size	Grit

DCP-27-BUFF	ShinePro® Pads for Floor Maintenance, 27 Inch, BUFF Grit	27 in / 686 mm	BUFF

SHINEPRO® DIAMOND SCREENS

FEATURING OUR PROPRIETARY ELECTROPLATED DIAMOND TECHNOLOGY, AND
DESIGNED FOR AGGRESSIVE CLEANING AND FLOOR RESTORATION.

ShinePro screens are ideal for aggressive cleaning, spot repair and restoration and offer significantly longer life compared to other diamond restoration systems. The 220 and 400 grit screens are very aggressive and designed for repair of heavily etched floors. Start with 600 grit screens to pduce a satin smooth surface.

We recommend using the screens wet - with weighted swing machines for smaller areas and autoscrubbers for larger areas. To use the screens, attach a standard same sized pad first. Always clean the screens after each use by hosing them with clear water. Offered in 13, 14, 15, 16, 17, 18, 20, 21, 24 and 27 inch sizes.

Item Number	Description	Size	Grit
DS-13-0220	ShinePro® Screen, Electroplated, 220 Grit	13 in / 330 mm	220
DS-13-0400	ShinePro® Screen, Electroplated, 400 Grit	13 in / 330 mm	400

DS-27-0600	ShinePro® Screen, Electroplated, 600 Grit	27 in / 686 mm	600

POLISHED CONCRETE MAINTENANCE GUIDE

DETERMINE WHAT TYPE OF FLOOR YOU HAVE, EVALUATE ITS CONDITION AND DECIDE
WHAT LEVEL OF SERVICE IT REQUIRES. Some sections of the floor may require different levels of maintenance.

DAILY MAINTENANCE:

- Dust mop.
- Scrub with an autoscrubber with ShinePro BUFF pad and a cleaning solution.
- (optional) High-speed burnish 1-3 times a week with ShinePro BUFF pad.

TO BRING LIGHTLY STAINED OR DIRTY FLOORS BACK TO EXPECTED GLOSS LEVELS:

Scrub with ShinePro 1800 pad for four passes with a clean- ing solution in auto-scrubber, and burnish with ShinePro 1800 grit pad. Alternate the direction of the auto-scrubber each night, starting at the stopping point from the previous night. Walk at a slower pace at areas with lower gloss or staining.

FOR LIGHTLY STAINED OR DIRTY FLOORS WHEN THE ABOVE PROCEDURE DOES NOT BRING BACK DESIRED CLARITY OR GLOSS:

- Dust mop.
- Scrub floor with ShinePro 800 grit pad for four passes, then two passes with ShinePro 1800 grit pad.
- High-speed burnish with ShinePro 1800 grit pad.
- Dust mop, apply appropriate protective treatment and high-speed burnish with ShinePro BUFF pad.

FLOOR RESTORATION PROCEDURE FOR FLOORS WITH WEAR PATTERNS, STAINS, AND MATTE LOOK, THAT DON'T RESPOND TO MAINTENANCE:

- Dust mop.
- Repair joints & pop-outs with repair material and joint filler.
- Scrub floor with ShinePro 400 grit pad working up to ShinePro 800 grit (multiple passes with each grit). If color is involved, apply dye after 400 grit.
- High-speed burnish with ShinePro 1800 grit pad.
- Dust mop and Scrub with ShinePro BUFF pad.
- Apply appropriate protective treatment if needed and burnish with ShinePro Buff pad.

ALTERNATIVE METHOD FOR LIGHT RESTORATION:

Use Lavina LB36G-S propane polisher or a weighted swing buffer with ShinePro Diamond Screens 220, 400, 600. Continue sequence with ShinePro 800 grit pad on scrubber as listed above.
