Avenge Clean Rinse

Neutral Extraction Emulsifier

Avenge Clean Rinse

Designed to work with the two Avenge Preconditioners, this rinse contains detergency of its own. It's formulated to rinse away soil and chemical residue thoroughly with minimal passes at 100 degrees, 220 degrees or anything in between. Helps prevent delayed bleeding and browning. Safe for your machine.

- Leaves no soil-causing residues.
- Won't contribute to browning or color bleeding.
- Effective cleaning ability aids in suspending and removing soil and oil.

Part Number:
CU24GL

RTU pH
7.0 - 7.5

Dilution Ratio:
1-2 oz / 5 gal

Contents:
One U.S. Gallon (3.79 Litres)

Available in:
Gallons and 4 x 1 gallon cases

DIRECTIONS

Pretest in an inconspicuous area for dye and fabric stability. Prespray Fabric using one of the Avenge Prespray products (follow the instructions on the label).

Portable Machines:

Dilute 1 to 2 ounces of Avenge Clean Rinse per 5 gallons of hot water. Extract using even, slightly overlapping strokes.

Truckmount Machines:

Dilute 1 quart of Avenge Clean Rinse per five gallons of water and meter as usual. Extract using even, slightly overlapping strokes.
