# Flex Fire

Powdered Extraction Rinse

## Flex Fire

Our most effective cleaning rinse ever. Flex FIRE extraction rinse is a high pH rinsing solution designed specifically for exceptionally soiled commercial carpet when all others have failed. Combine with Flex Powder with Citrus Solv to remove traffic lanes previously considered uncleanable.

- DISSOLVES QUICKLY – Flex FIRE rinse will dissolve quickly, creating a crystal-clear cleaning solution.
- LOW COST - concentrated powder means you use less and save money.
- EQUIPMENT SAFE - has special additives that help prevent corrosion and buildup in the extractor or truckmount.
- HIGH CLEANING POWER - Flex FIRE rinse will surpass all other extraction agents due to its aggressive alkalinity and high percentage surfactant blend.

Part Number:  
1627-4983

RTU pH  
11.3 - 11.5

Dilution Ratio:  
1 oz / 5 gallons

Contents:  
Six Pound Jar (2.72 Kilograms)

Available in:  
Six Pound Jars 4 x 1 jar cases,  
36 lb. pails and 370 lb. drums

## DIRECTIONS

To be used as the primary cleaning agent, or as a rinse agent, in the extraction process for heavily soiled commercial carpets. It's highly recommended that a water softener be used for best performance results and to prevent precipitation caused by high heat truckmounts and hard water. If a water softener is not used, reduce heat to below 200 degrees.

**For truckmount concentrate:** Add 1 to 2 cups of Flex FIRE rinse to five gallons of cold or warm water. Mix thoroughly until dissolved. For systems metered on low settings, or for excessively soiled carpets, 3 cups may be used.

**For portable equipment:** Use 1 ounce of Flex FIRE rinse per 5 gallons hot water. For extra heavy soil use 2 ounces per five gallons of hot water.
