

## Technical Information Sheet

**DAILY CONDITIONER/CLEANER**  
**NO RINSE CONDITIONER/CLEANER**  
**FOR DAILY USE ON ALL STONE**

### APPLICATION

214M is a 100% natural, pH neutral conditioning cleaner that is safe for all stone and ceramic surfaces. Daily damp mopping with 214M will maintain the stone's patina. Regular use helps to create a slip retardant, scuff resistant, buffable and dust repellent surface, while remaining completely undetectable on the surface. 214M is an essential part of the GranQuartz Stone Care System and is well suited for auto scrubber use.

### DIRECTIONS FOR DAILY MOPPING

- 1) Remove all dirt or dust.
- 2) Use 1.5 to 3 oz. 214M per gallon of clean water (mix only 1 to 2 gallons of solution at a time).
- 3) Using a finish mop (not cotton) dedicated to 214M use only, soak mop and wring well. Apply solution to surface in long, smooth strokes. Do not overlap strokes. Rinse and re-soak mop often and change solution when it appears soiled. **DO NOT RINSE.** To obtain ultimate results on polished surfaces, buff after solution has dried.
- 4) Deep Cleaning with GranQuartz Stone Care Systems 515C is recommended every 3 to 6 months depending on traffic volume and seasonal conditions (on polished surfaces GranQuartz Stone Care Systems 213M may be used on an alternating basis for added foot traffic protection and to improve the appearance of worn floors).

### DIRECTIONS FOR AUTOSCRUBBERS

- 1) Add 213M to the solution tank at the rate of 1 oz. per gallon of clean water.
- 2) Regulate the metering valve so that the flow of the solution wets the floor but does not pool.
- 3) Allow squeegee to drop but do not lock.
- 4) With vacuum turned on, move scrubber over surface in long, straight lines. Non-abrasive pads or soft brushes may be used.

***Test in a small area prior to general application to determine application amounts and appearance.***

**COVERAGE:** 8,000 to 12,000 sq. feet per liter.

<Symbol GHS07> Warning

Causes serious eye irritation. Keep out of reach of children. Wear eye/face protection. If eye irritation persists: Get medical advice/attention. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents and container in accordance with local and national regulations.
