

## Technical Information Sheet

### **GRANITE CLEANER AND RUST INHIBITOR** **REMOVES CEMENT FILM AND MINERAL DEPOSITS**

#### **APPLICATION**

725C is a heavy duty acid based cleaner for use on polished, flamed or otherwise textured granite and other non polished natural stones. **Do not use 725C on polished stone other than granite.** 725C quickly removes grout and mortar residues, lime and hard water mineral deposits, efflorescence, surface rust and heavy construction dirt. 725C contains a rust inhibitor to help control future rust formation and may be used for indoor and outdoor applications.

#### **DIRECTIONS**

- 1) Protect all adjacent acid sensitive surfaces. To prevent surface damage, ensure that the 725C solution does not contact polished surfaces such as marble, limestone, travertine, terrazzo or any other polished stones that contain calcium, as well as glass, brass and other metals. Carpet and other adjoining non-stone surfaces may also be adversely affected.
  - 2) wet area with clean water. Never apply this product to a dry surface.
  - 3) Mix 1 part 725C with 5 parts of water. Dilution adjustments may be required (1 to 1 maximum) for heavier concentrations of mineral deposits and efflorescence.
  - 4) Apply diluted solution to wet surface and scrub vigorously with a stiff bristle brush. Allow at least 5 minutes dwell time before rinsing. Re-agitation and longer dwell times may be required for heavier dirt. Do not allow solution to dry on the surface; re-wet as needed.
  - 5) Rinse well with clean water and continue to rinse until all solution has been removed.
- Test in a small area prior to general application to determine application amounts and appearance.**

**COVERAGE:** 200 to 300 sq. feet per liter.

<Symbol GHS05> Danger

Contains phosphoric acid.

May be corrosive to metals. Causes severe skin burns and eye damage. Contains But-2-in-1,4-diol. May produce an allergic reaction. Keep out of reach of children. Keep only in original container. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician. Store locked up.

**CONTENTS:** hydrochloric-acid, but-2-yne-1,4-diol (CAS-No. 000110-65-6), orthophosphoric-acid (CAS-No. 007664-38-2), water (CAS-No. 7732-18-5)
