

206R Marble Polishing Compound

Overview

Restores Polish To Marble, Limestone, Travertine and Terrazzo.

Packaging:

5 lbs. (2.26 Kg) Bucket

10 lbs. (4.53 Kg) Bucket

25 lbs. (11.33 Kg) Bucket

Applications & Directions

206R Marble Polishing Powder is a unique blend of high quality polishing materials. This product restores the polish to worn Marble, Limestone, Travertine, Terrazzo and other calcium containing stone using the same process with which the original factory finish was produced.

206R removes etch marks and can be used on floors, bar tops and furniture.

Coverage: 175 to 225 sq. feet per Pound. depending on porosity of stone.

1. Clean surface to ensure that it is completely free of dirt, wax, or other sealers.
2. Protect all acid sensitive surfaces next to work area.
3. Working on 4' x 8' areas at a time, lightly wet work area and adjoining areas using a sprayer or damp mop.
4. Sprinkle 1/8 to 1/4 cup of 206R in center of the work area, and add enough water to form a slurry (buttermilk consistency).
5. Using a red, white or natural fiber buffing pad with buffing machine (up to 300 RPM), work slurry over area several times.
6. When desired results are achieved, flood area with water using machine solution tank and vacuum flooded solution.
7. Immediately after vacuuming, rinse area with liberal amounts of clean water and vacuum dry.
8. Proceed to next 4' x 8' area. Repeat steps 3 thru 7, completing job in checkerboard style.

Test in a small area prior to general application to determine suitability, amounts and appearance.

Health & Safety

Irritating to eyes. Keep out of the reach of children. If swallowed, seek medical advice immediately and show this container or label. See MATERIAL SAFETY DATA SHEET, for further information.

Content: Potassium oxalate
